Clear-cutting will be taking place at highlighted area. During this time, the public must use the designated alternative route. This is essential to ensure the safety of visitors as well as the forestry team working on site.

The clear-cutting area along the forest road and the electric power line will be felled first, with banksmen positioned at both ends to ensure safe management of the site. Barriers at each end will remain closed from morning until afternoon while felling operations are in progress. During this time, the public must use the designated alternative route. This is essential to ensure the safety of visitors as well as the forestry team working on site.
